

PRO[®]
NURSE

PROTECTIVE AND NATURE

NATURAL COSMETICS

PROFESSIONAL SKIN CARE

The private **PRO-NURSE®** brand of Czech natural cosmetics was created in 2014. Since then, we've put all our profits back into research and developing new types of cosmetic products which the Czech and international market demands. **PRO-NURSE®** cosmetics are designed for adults and children from 3 years of age. Since 2018, they have been marketed under the registered brand names **PRO-NURSE®** and **PRO-NURSE™**.

We offer a complete range of **PRO-NURSE®** cosmetics for medical, spa, and hygienic purposes. Cosmetic products can be combined as needed. The natural and verified composition, together with a balanced lower pH, ensures quality effectiveness, stability, and the elimination of problems to provide subsequent protection and recovery for every skin type.

PRO-NURSE® cosmetics was originally designed solely for the professional health and social care market, but a rising popularity and demand for the cosmetics brand eventually gave it a new mission: to provide trouble-free use in everyday life.

Body milks and creams act like a balm on highly stressed skin over the entire body. This is why we offer three product types from a basic cream, to our most popular brand of special cream and body milk with hemp oil; the proof of its effectiveness is how it makes your skin feel.

The first cosmetic product that we began manufacturing in 2014 was a special zinc ointment intended primarily for stressed skin at risk of bedsores, or where bedsores have already occurred and need to be treated and removed. Its journey into the market was not easy, but close cooperation with healthcare professionals enabled us to create a fine viscous ointment with a mixture of natural

oils that provides an excellent consistency and pain-free application.

The presence of complex infectious diseases that necessitate the frequent use of hand disinfection led us to develop a new **hand cream with marigold** that can be used on the whole body. This cream is a favourite for its stability and richness. Most of all, it absorbs very quickly so that you can put gloves on again or start working with documents without smudging them. The cream prevents painful cracking of highly stressed skin and is also effective at preventing hyperkeratosis. It does not contain urea which, although it stimulates healing, also stings in open wounds.

The healthcare market and the field of social care have demanded a precise approach in the development and production of high-quality **washing foam**; together with **zinc ointment, body oil** in a spray, and **cooling gel**, these are collectively known as the "hospital quartet". These cosmetic products have been popular for years.

We have also developed and manufactured a special **washing gel**, a hair shampoo and shower milk in one. Like all **PRO-NURSE®** cosmetics, this shampoo has all-natural ingredients including hemp oil, making it ideal for the skin from head to toe. In combination with **PRO-NURSE®** body milk, it

ensures an overall calm and stress relief after a full day's work.

All our products are properly tested and certified, and their dermatological tests have produced excellent results. Each batch is subjected to tests for the presence of foreign substances and is stamped with the lot number, date of manufacture, and best-before date.

We'll close with a word of advice – don't decide based on the product's price, but its capabilities.

Be friendly to your skin, and let our natural products help you!

The MEDISUN and LUCA Team

PROTECTIVE AND NATURE

PRO-NURSE® ZINC OINTMENT WITH VITAMIN E

Designed primarily for the treatment of skin defects and as a healing ointment with a high zinc oxide content and a balanced ratio of natural oils. These oils make the ointment easily spreadable and absorbable. The high percentage of zinc oxide creates a fine white film.

It soothes and protects irritated areas on the skin. The zinc oxide in the ointment forms a protective complex in sensitive areas.

Always follow the rules of correct application! The ointment should be applied in a very fine and thin film. Do not overapply the ointment to the skin!

Put an appropriate amount in your palm depending on the size of the affected area, or carefully apply the ointment directly from the tube around the edge of the affected area. If applied directly, the ointment must be used for one patient only.

Apply ointment to the affected area and its immediate surroundings so that no white crust remains on the skin after application. White dots on the skin are a sign of correct application. These dots are filled skin pores through which the zinc oxide reaches the affected area. A thick layer (crust) will dry out the area and create the risk of cracking the newly formed upper layer of skin! This problem can be eliminated by using PRO-NURSE® Cannabis body cream, but with

correct application, this combination won't be necessary.

Apply the ointment 3 to 5 times a day depending on the extent of skin damage. Keep the wound hygienically clean! Before applying to an open wound, first squeeze about 2 cm of ointment from the tube and discard it.

INGREDIENTS Aqua, Silybum Marianum Oil, Zinc Oxide, Soya Oil, Prunus Amygdalus Dulcis Oil, Cetyl Alcohol, Glyceril Stearate, Polyglyceryl-3 Methylglucose Distearate, Phenoxyethanol, Ethylhexylglycerin, Cetearyl Nonanoate, Xanthan Gum, Tocopherol, Parfum.

PRO-NURSE®

WASHING FOAM IN SPRAY

Designed for the demanding care and hygiene of immobile patients suffering from incontinence, but also suitable for outpatient and routine treatment, and for hygiene of hard-to-reach skin folds in cases of extreme obesity and the like. The washing foam is a mixture of water and a soap which contains a surfactant, specifically sodium lauroyl sarcosinate. Shortly after application, this surfactant will lower the surface tension of stool residues, urine, and heavy dirt, making it also suitable for cleaning injured patients upon their admission to the hospital.

The foam has a balanced composition and contains healing bisabolol, a chamomile extract. In combination with other active substances, it leaves the skin silky and supple to ensure the prevention of decubitus ulcers and diaper dermatitis.

The foam is not sticky and leaves a very pleasant feeling of purity with a gentle perfume. It is designed for the entire range of clients and patients. The foam does not need to be combined with other products. When the skin is highly macerated, it can be supplemented with oils or care creams from our range.

The foam has a medium decomposition, thus optimally utilizing the action of solvents of organic impurities. The myth that a foam

must be thin and disintegrate quickly has been successfully dispelled by our product for several years.

PRO-NURSE® washing foam is one of our TOP products and, together with zinc ointment, is our longest successfully sold product on the European market.

INGREDIENTS Aqua, Isobutane, Propylene Glycol, Polysorbate 20, Cetearyl Alcohol, Propane, Caprylyl Glycol, Butane, Sodium Lauroyl Sarcosinate, Steareth-20, Bisabolol, Parfum, Caprylhydroxamic Acid, Glycerin, Lactic Acid.

PRO-NURSE® BODY OIL IN SPRAY

A mixture of nourishing oils with vitamin E. This is a very gentle caring massage oil in a perfume-free spray for everyday use. It protects the skin from external influences, especially in case of incontinence. The oil gently lubricates the skin without stressing it. The oil is not sticky and is absorbed after a short while. After soaking into the skin, the oil leaves no long-lasting greasy or impermeable film. Suitable for the treatment of scaly, hardened, and defective skin. It is also designed for massages, where a sufficient amount can be applied to the massaged area to perform all types of oil and contact massages. It removes skin tension and is very suitable for large colloidal and hypertrophic scars, lubricating the scar to relieve the tension that restricts normal movement. Massage on these affected scarred areas speeds up the healing process and makes post-traumatic scars smaller.

The oil contains no UV filter due to its application to sensitive areas, so it cannot be used as a sun protection oil.

INGREDIENTS Paraffinum Liquidum, Isobutane, Propane, Butane, Silybum, Marianum Seed Oil, Prunus Amygdalus Dulcis Oil, Tocopheryl Acetate, Bisabolol.

PRO-NURSE®

COOLING GEL

WITH COMFREY AND VITAMIN E

A gentle cooling gel with healing comfrey extract. The gel is designed to refresh and cool stressed skin, especially for long-term patients. It can be also used by active athletes to cool tense and overloaded muscles. The high comfrey content significantly helps in the treatment of muscle tension, vein inflammation, bruises, fractures, and post-traumatic muscle conditions. The gel has also proven to be excellent for relieving pain in the internal varicose veins, where it relieves internal tension and pain. Vitamin E in the gel serves as an antioxidant and protects the cell wall from free radicals. It helps to slow down the aging of the skin with the advantage of preventing cancer.

INSTRUCTIONS FOR USE Apply an appropriate amount of gel and rub into the skin of affected areas. Avoid contact with open wounds, mucous membranes, and direct contact with eyes. In the event of contact, rinse the affected area with running water.

Sports and relaxation massages provide an extraordinary sensation of warming up the massaged area, with a pleasant cooling and overall calming effect following the massage.

INGREDIENTS Aqua, Alcohol, Glycerin, Menthol, Symphytum Officinale Root Extract, Carbomer, Mentha Piperica Oil, Eucalyptus Globulus Leaf Oil, Limonene, Sodium hydroxide, Trideceth-9, Jojoba Esters, Phenoxyethanol, Ethylhexylglycerin.

PROTECTIVE AND NATURE

PRO-NURSE® PROTECTIVE CREAM WITH MARIGOLD

Protective cream with marigold is a popular variant of a natural non-greasy cream with nourishing substances for demanding users and at a very reasonable price. Its advantage is quick absorption into dry skin. The cream protects the skin of hands that work with disinfectants or work in gloves as well as protecting frequently-washed hands from drying out. The cream is suitable for all day use.

The protective cream with its high marigold extract content relieves you of the feeling of dry and rough skin. It hydrates very well and quickly soothes irritated skin. Marigold is also known for its highly antiseptic, antibacterial, anti-inflammatory, and healing effects. The gentle pleasant touch of a stylish French perfume will make your everyday use more pleasant. After a day's work, we recommend combining this protective cream with one of our other creams, especially *PRO-NURSE® BODY CREAM CANNABIS*, which soothes the hands overnight and prepares them for hard, all-day work.

The cream contains no paraffin components or petroleum products that may insulate the hands but still clog pores and prevent the skin from breathing.

INGREDIENTS Aqua, Silybum Marianum Oil, Prunus Amygdalus Dulcis Oil, Butyrospermum Parkii Butter, Cocos Nucifera Oil, Cetyl Alcohol, Cera Alba, Polyglyceryl-3 – Methylglucose Distearate, Tocopherol, Callendula Officinalis Seed Oil, Parfum.

PROTECTIVE AND NATURE

PRO-NURSE®

SHOWER SHAMPOO

WITH NECTARINE

This shower shampoo is exceptional for its washing and healing abilities. This is no ordinary shampoo or shower gel. The washing gel is developed for the hypersensitive skin of long-term patients and contains, among other things, a balanced ratio of natural oils of milk thistle, sweet almonds, Aloe Vera juice, coconut, shea butter, hemp oil, rosemary, lavender, and thyme, with additional fine nectarine, minerals, and vitamin E.

The shampoo cares for hair very well without drying it out and makes the skin soft and naturally smooth. The washing gel is hypoallergenic and is well tolerated by adults and children from 3 years of age and is also available as a variant in the PRO-NURSE® Baby line for babies from 0 to 3 years. Both variants are subject to dermatological testing, just like all our products.

The gel is supplied in two types of packaging, a 200 ml tube and a 400 ml bottle. These types of packaging meet most of our clients' needs.

The washing gel can also be used as a very gentle soap for frequent hand and face washing.

After a bath, we recommend using our body milks; they provide maximum nutrition to the skin and combine with the gel to keep it supple and healthy.

Even though the washing gel is designed for very delicate skin and has passed all dermatological tests and clinical trials, we recommend that the product be carefully tried first in cases of severe psoriasis or atopic eczema. The gel positively soothes the symptoms of eczema, including atopic eczema, and symptoms of psoriasis. It is also very popular in the "adult" form for small children from 3 years of age.

INGREDIENTS Aqua, Prunus Amygdalus Dulcis Oil, Silybum Marianum Oil, Butyrospermum Parkii Butter, Glycine Soya Oil, Cocos Nucifera Oil, Cera Alba, Cetyl Alcohol, Glycerol Monostearate, Polyglyceryl-3 Methylglucose Distearate, Squalane, Aloe Vera Juice, Tocopherol, Rosmarinus Officinalis Leaf Oil, Lavandula Hybrida Oil, Thymus Vulgaris Flower/Leaf Oil, Parfum.

PROTECTIVE AND NATURE

PRO-NURSE®

BODY MILK & CREAM

NEUTRAL

Body Milk Neutral and Body Cream Neutral with gentle perfume are designed primarily for the lubrication of normal skin. Both products contain a balanced mixture of natural oils with a high content of vitamins and minerals. The basic composition of oils from sweet almonds, milk thistle, shea butter, soy, coconut, and a triad of Provençal herbs leaves a delicate natural scent.

Body Milk Neutral and Body Cream Neutral are the basic varieties of the three creams we produce. They are hypoallergenic and are intended for slightly stressed skin. Both products are suitable both as a day and night milk/cream. They can be also used on the face and neck after makeup removal.

Both products can always be used for all-day care in hospitals and other facilities.

The Milk and Cream are a mixture of natural substances and oils and are well tolerated by all skin types and colours. They supply the skin with nourishment and make it soft and supple. They soak in quickly and leave no greasy or impermeable film after application.

Both Milk and Cream products have the same ingredients. The only difference is in their thickness and therefore in their application.

INGREDIENTS Aqua, Prunus Amygdalus Dulcis Oil, Silybum Marianum Oil, Butyrospermum Parkii Butter, Glycine Soya Oil, Cocos Nucifera Oil, Cera Alba, Cetyl Alcohol, Glycerol Monostearate, Polyglyceryl-3-Methylglucose Distearate, Squalane, Tocopherol, Rosmarinus Officinalis Leaf Oil, Lavandula Hybrida Oil, ThymusVulgaris Flower/Leaf Oil, Parfum.

PRO-NURSE®

BODY MILK & CREAM

ALOE VERA

Body Milk Aloe Vera and Body Cream Aloe Vera with gentle perfume are designed primarily for lubricating heavily stressed skin. In addition to Aloe Vera juice, they contain a balanced mixture of natural oils with a high content of vitamins and minerals. The basic composition of oils from sweet almonds, milk thistle, shea butter, soy, coconut, and a triad of Provencal herbs leaves a delicate natural scent. Aloe Vera helps to soothe the symptoms of eczema and other negative skin symptoms.

Body Milk Aloe Vera and Body Cream Aloe Vera are the middle varieties of the three creams we produce. They are hypoallergenic and are intended for heavily stressed skin, and both products are suitable as a day and night milk/cream. They can be also used on the face and neck after makeup removal.

The Milk and Cream are a mixture of natural substances and oils and are well tolerated by all skin types and colours. They supply the skin with nourishment and make it soft and supple. They soak in quickly and leave no greasy or impermeable film after their application.

Both Milk and Cream products have the same ingredients. The only difference is in their thickness and therefore in their application. The Milk is easier to apply and so it can be

also used after bath, sunbathing, and sunburn, although the Cream can be used in these applications as well.

INGREDIENTS Aqua, Prunus Amygdalus Dulcis Oil, Silybum Marianum Oil, Butyrospermum Parkii Butter, Glycine Soya Oil, Cocos Nucifera Oil, Cera Alba, Cetyl Alcohol, Glycerol Monostearate, Polyglyceryl-3-Methylglucose Distearate, Squalane, Aloe Vera Juice, Tocopherol, Rosmarinus Officinalis Leaf Oil, Lavandula Hybrida Oil, Thymus Vulgaris Flower/Leaf Oil, Parfum.

PROTECTIVE AND NATURE

PRO-NURSE® BODY MILK & CREAM CANNABIS

Body Milk Cannabis and Body Cream Cannabis with gentle perfume are designed primarily for the lubrication of extremely stressed skin with a tendency toward eczema and psoriasis. In addition to hemp oil, they contain a balanced mixture of natural oils with a high content of vitamins and minerals. The basic composition of oils from sweet almonds, milk thistle, shea butter, soy, coconut, and a triad of Provencal herbs leaves a delicate natural scent. Cannabis/hemp helps to soothe the symptoms of eczema and other negative skin symptoms in both adults and children from 3 years of age.

Body Milk Cannabis and Body Cream Cannabis are the last varieties of the three creams we produce.

They are hypoallergenic and are intended for extremely stressed skin. Both products are suitable as a day and night milk/cream.

The Milk and Cream are a mixture of natural substances and oils and are well tolerated by all skin types and colours. They supply the skin with nourishment and make it soft and supple. They soak in quickly and leave no greasy or impermeable film after their application. They can be also used on the face and neck after makeup removal.

Both Milk and Cream products have the same ingredients. The only difference is in their

thickness and therefore in their application. The Milk is easier to apply and so it can be also used after bath, sunbathing, and sunburn, although the Cream can be used in these applications as well.

INGREDIENTS Aqua, Prunus Amygdalus Dulcis Oil, Silybum Marianum Oil, Butyrospermum Parkii Butter, Glycine Soya Oil, Cocos Nucifera Oil, Cera Alba, Cetyl Alcohol, Glycerol Monostearate, Polyglyceryl-3-Methylglucose Distearate, Squalane, **Cannabis Sativa Seed Oil**, Tocopherol, Rosmarinus Officinalis Leaf Oil, Lavandula Hybrida Oil, Thymus Vulgaris Flower/Leaf Oil, Parfum.

PRO-NURSE® MASSAGE OIL WITH VITAMIN E

This healing massage oil seems to go beyond the medical field because it can be used successfully where the skin requires extreme lubrication with a long oily effect.

The oil can be used successfully for post-burn treatment when the scars and blisters are completely closed. Do not lubricate open burns and cracked blisters with oil. They must first be treated professionally! Regular lubrication of closed scars will reduce the pain of tight skin. A gentle massage helps to create new skin and alleviates the effects of scarring.

The massage oil can be used in spas for oil wraps and rehabilitation procedures where it can be compared to the most expensive Chinese medicine oils thanks to its ingredients. The oil can also be used for warm oil compresses and lava stones can be heated in it. It is fabulous for Zen medicine and massages. After application and long-term massage, your body finds its natural harmony and calms down.

The oil contains all-natural mixture of oils from milk thistle, sweet almonds, shea butter, coconut and marigold which guarantees a perfect effect. The oil contains NO paraffin.

The oil is easily spreadable and absorbable. It is very rich and nourishing! Only a very small amount is necessary for the application!

INGREDIENTS Aqua, Silybum Marianum Oil, Prunus Amygdalus Dulcis Oil, Butyrospermum Parkii Butter, Cocos Nucifera Oil, Cetyl Alcohol, Cera Alba, Polyglyceryl-3-Methylglucose Distearate, Tocopherol, Callendula Officinalis Seed Oil, Parfum.
